Rafael Benítez Díaz

Frontend Developer

I am a programmer passionate about developing competent software that translates into business opportunities and, I am willing to work on new projects and vacancies they generate. I am confident that creating effective, understandable, scalable and efficient software is an excellent way to address many of the needs of organizations and society while generating value in the process.

MOST RECENT WORK EXPERIENCE

Currently I do not have work experience, however, I have personal projects in which I show my skills.

Nekoma TT

This is a website I made for a real table tennis club, but at the end of the day I didn't sell it.
To create this website I used HTML, CSS, JavaScript and Google Maps.

Rap & EDM Festival

Rap & EDM Festival it's a project that simulates the website of a music festival, like EDC.
The technologies that I used are HTML, SASS, Javascript, NodeJS and Gulp.

Mokepon

Mokepon it's a project that I made in a Platzi course. It's a videogame made with HTML, CSS, JavaScript, NodeJS and ExpressJS.

Raff.Dev

This is my personal website, when people can see my projects, skills, resume and my social media.
I create it with HTML, CSS, JavaScript and the website design it's mine. I want to do it in a minimalistic way.

Certifications

- ★ Basic Programming Course from Platzi
